

# Le metier de développeur(se) WEB

Michael  
X NATIS

# Navigateur (en mode dev)

The screenshot shows a web browser in developer mode. The main content area displays a recipe for "Iga Babi Bali (Balinese Sticky Glazed Pork Ribs)" from "Cooking with The New York Times". The recipe is labeled "RECIPE OF THE DAY". The text describes the dish as "This sweet and smoky dish can easily be made in advance and reheated."

The right-hand side of the image shows the browser's developer tools, specifically the Network tab. It displays a list of network requests, including various JavaScript files and images. A tooltip is visible over one of the requests, showing details like the name, status, type, and size. The console at the bottom shows a message about the Chrome 86 update and a link to the new media panel.

### About

TypeCobol is an Incremental Cobol parser for IBM Enterprise Cobol 5.1 for zOS syntax. TypeCobol is also an extension of Cobol 85 language which can then be converted to Cobol85.
